Rosa Aurora Borealis™

Andromeda 'Bergy Bit'

Rosa 'Oscar Peterson'

The *Aurora Borealis™* rose, the third addition to Vineland's 49th Parallel Collection will be release in **2021**. The hardy rose flower colour is sunset pink and blooms in flushes throughout the season with a light fragrance. Foliage is dark green and glossy. It is resistant to black spot and powdery mildew. <http://49throses.com>

The *Andromeda polifolia* 'Bergy Bit' was selected through the Plant Breeding Program "Plant Atlantic" at the Memorial University of Newfoundland Botanical Garden (MUNBG). The plant is hardy, grows in full sun, and appears to be tolerant to drier conditions compared to other andromeda. The white flowers and blue-tinted foliage are similar to the colours of 'Bergy Bit', a local term for a small iceberg.

Named after the Canadian pianist and jazz composer Oscar Peterson, the only pure white flower rose coming from the Canadian Artists Series is always a winner. Upright in habit, repeat bloomer, with clean glossy foliage, a must in your garden.
